1. **SCOPE OF THE WORK**

The broad scope of the work includes

a. Design, supply, installation and commissioning of 10 kWp Solar PV Power Plant in 20 No.s of Schools/Hostels for ITDA, Kandhamal (List of Schools/Hostels at Annexure A)

b. Supply, Installation and commissioning of 10 Nos of Solar PV Street Lights within each school/hostel premises in suitable locations to be identified by the Head Master of the concerned school and confirmed by the concerned AD(T), OREDA.

e. Separation of about 7.5 to 8 kW load from out of the existing loads and connecting the same to the ACDB of the solar PV Power plant.

f. Testing of all installed systems in presence of the Head master and other staff of the school/hostel and also Technician/AD(T) of OREDA.
g. Imparting training to at least two staff members of the school/hostel in day to day maintenance and upkeep of the installed systems.

h. Providing O&M manuals printed in Odia language to each of the trained staff members as well as 3 extra copies to the head master of the school.

i. Providing Remote Monitoring Systems in DC Generation Meter to be connected to the array output of the solar PV power plants and sharing the RMS protocol as well as log- in ID and pass word of each system with the School, AD(T), OREDA as well as concerned division of OREDA.

j. Providing monthly/quarterly report on usage of solar power by the school/hostel indicating daily and hourly consumption.

k. Submission of quarterly maintenance report in prescribed format.

l. Undertaking periodic maintenance of the systems as per the maintenance schedule (Annexure B) given in this document and submitting the required maintenance reports.

m. Displaying the contact details of Customer Relationship Centre in prominent places like near battery bank/ inverter, Solar PV array, Head Master’s/ Warden’s room, school/hostel common room/dining hall etc.

n. Open a local office at Bhubaneswar so as to deliver uninterrupted and sustainable maintenance services and share its contact details with all concerned.

o. After completion of 5 years undertake detailed inspection of the installed system along with Head Master of the School and AD(T)/his representative and prepare an exit report and hand over the same to the school under intimation to the concerned RE cell as well as to OREDA Hqr. or continue further AMC if the school so desires.

2. **ELIGIBILITY CRITERIA FOR PARTICIPATING IN THE BID:-**

   a. The bidder must have been registered in Odisha as a company (registered under Indian Companies Act 1956) or a Partnership Firm (registered under Indian Partnership Act 1932) or a Sole Proprietorship Firm and should have registered under GST.

   b. The bidder must have installed systems/devices and maintained the same for at least a period of 5 years in the state of Odisha. As a testimony for that the bidder is required to submit the details of installation & maintenance as per the format at Page No. 48.

   c. MSMEs must have been registered under MSME Development Act 2006 in Odisha under Section D, Division 35 , Group 351 having NIC 5 digit Code - 35105 (Electric power generation using solar energy)

   d. The bidders must have minimum average annual turnover of Rs 1 Crore over last three years exclusively in the business of solar PV. Local MSMEs as described in para ‘c’ above must have cumulative turnover of Rs 25 Lakhs over the last three years.

   e. The bidder must be in possession of valid test certificates for the following equipments and must submit the same along with the technical bid.

   **Solar Power Plant**
i. solar PV module  
ii. Power control Unit  
iii. Battery  
iv. Junction boxes.  
v. Module Mounting Structure  
vi. Wire & Cables  
vii. Surge Protection device  
viii. Lightening Arresters  
ix. Earthing  
x. ACDB/DCDB  

The component wise requirement of test certificates has been given in Annexure-C  

f. The bidder must have commissioned minimum 200kWp (cumulative) and 10 kWp (individual) capacity rooftop solar power plants during last 3 years and Local MSME bidder as described in para ‘c’ above must have commissioned minimum 50 kW (cumulative) in Schools/Hostels owned by Govt / PSUs/ Govt Agency/ Bodies. As proof of installation the bidder must submit the work completion certificates certified by designated Public Officer in favour of each installation.  
g. The bidder must have the capacity to manufacture/Integrate solar power plants for a cumulative capacity of 1000 kWp per annum. Local MSMEs bidder must have this capacity as 100 kWp per annum. The relevant manufacturing capacity must be reflected in the stores details certified by NSIC/OSIC/DIC/such other certifying organizations.  
h. The products offered by the bidder must adhere to minimal technical requirements specified under the Jawaharlal Nehru National Solar Mission.  
i. The bidder’s company/firm must have established quality assurance systems and organization in line with the requirements under ISO 9001:2015 or ISO 14001:2015 certification. MSMEs those have not established such quality assurance systems may participate in the tender and upon their selection they must establish the above before issue of work orders.  
j. The bidder’s company/firm must not have been debarred / blacklisted by any Govt. Dept., agency, PSUs / institution / agencies / autonomous organisations. The bidder shall submit a self-certification by an authorized person duly notarized to this effect.  

3.1 General Instructions  
- Interested bidders are advised to view the detailed tender documents on www.oredaorissa.com or www.tenderwizard.com/OREDA.  

- Bidders desirous of participating in the tender shall have to pay the tender costs mentioned in TENDER SCHEDULE. The tender cost is required to be paid in shape of Demand draft only, drawn in favour of Chief Executive, OREDA payable at Bhubaneswar. The tender cost is inclusive of GST and is not refundable.  

- All participating bidders shall have to pay the non-refundable tender processing fee as mentioned in TENDER SCHEDULE to K.S.E.D.C. Ltd. Bangalore through Tender Wizard
Portal on e-payment modes only such as credit/debit cards, Net banking etc.

- Earnest money as specified in bid should be deposited in shape of Demand Draft drawn in favour of the Chief Executive, OREDA payable at Bhubaneswar from any nationalized bank. Alternatively the EMD can also be submitted in shape of Bank Guarantee from any nationalized bank in the format given at Annexure H having validity of 45 days.
- The bidders shall submit copies of documents defining their respective constitutional or legal status, place of registration and principle place of business of company or firm or partnership.
- Only bidding companies are required to submit Board Resolutions in prescribed format given.
- Bidding firms are required to submit documents related to assignment of Power of attorney to sign the agreement on behalf of bidders.
- Bidding Partnership firms are required to submit complete partnership deeds along with the bid documents.
- The bidder shall submit reports on their financial standing such as audited profit and loss statements, balance sheets, auditor’s report for the past three years. All accounting statements must be duly audited and submitted along with auditor’s note on accounts and accounting standards.
- The bidders shall submit information on their performance during last 3 years in format given at Annexure-D.
- The bidders shall have to indicate their capacity to manufacture/integrate the different solar PV systems asked for in this tender within the specified time after meeting all their other similar commitments.
- The supplied materials should strictly comply with the specifications as mentioned in the bid, otherwise the material would be liable for rejection.
- Certificate to the effect that the systems to be supplied are indigenous & not fully imported must be furnished.
- Since timely execution of works is of paramount importance, requests for extension of time shall not be ordinarily entertained.
- Notice inviting tender, bid documents, prescribed Technical bid, price bid, terms & conditions will form the part of the tender.
- Bidders may in their own interest visit the sites before submitting bids.
- All Taxes applicable at the time of supply will be admissible.
- In case of supply of any defective material or substandard material, the materials will be rejected & it will be the responsibility of the supplier for taking back & replacing the rejected materials at their own cost. In case of non-lifting of such rejected materials within a reasonable time offered by the office it will have the right to suitably dispose off the same and forfeit the amount.
- OREDA will not be responsible for any incidental or consequential losses of the firms while execution and till expiry of the period of maintenance.
During the warranty period, MNRE/ State Agencies/ Users reserve the right to cross check the performance of the systems with the minimum performance levels specified in the MNRE specifications.

- Deviations in terms and conditions, Specification of material, Inspection clause etc. will not be accepted under any condition.
- The Electronic Form/Template of the Techno –Commercial bid, as available on the portal, shall be duly filled in and scanned copies of documents in support of meeting the minimum qualifying requirement of the tender shall be given as attachments.
- Prices quoted must be firm and fixed. No price variation / escalation shall be allowed during process of completion of the project.
- Any condition in regards to financial aspects, payments, terms of rebate etc. beyond the prescribed financial terms of OREDA will make the bid invalid.
- Therefore it is in the interest of the bidders not to write anything extra in the Price Bid except price.
- Canvassing in any manner shall not be entertained and will be viewed seriously leading to rejection of the bid.
- All subsequent addendum/Corrigendum to the tender shall be hoisted in OREDA’s official web site www.oredaorissa.com and www.tenderwizard.com/OREDA only.

3.2 SUBMISSION OF BIDS:

- The bids must be submitted only online on www.tenderwizard.com/OREDA portal.
- The bidder must ensure that the bids are received in the specified website as per the date and time indicated in the Tender notice.
- The bidders are advised to register their user ID, Password, company ID on website www.tenderwizard.com/OREDA by clicking on hyper link “Register Me”.

3.2.1 PROCEDURE FOR SUBMISSION OF ONLINE BIDS

A. ACQUISITION OF DIGITAL SIGNATURE CERTIFICATE

For participating in the bid it is mandatory to procure the Digital Signatures of Class III only.

B. REGISTRATION IN TENDER WIZARD PORTAL

- Log in www.tenderwizard.com/OREDA Click “Register”, fill in the online registration Form.
- Un-registered bidders are required to pay registration fee of Rs 2300/- to M/s KSEDCL, Bangalore in tender wizard e-payment mode only.
- All bidders are required to pay the tender processing charge of Rs. 5900/- to M/s KSEDCL, Bangalore in tender wizard portal in e-payment mode only.
- As soon as the verification is done the e-tender user ID will be enabled/ provided.
c. **ON-LINE REQUEST FOR e-TENDER DOCUMENTS**

After viewing Tender Notification in [www.tenderwizard.com/OREDA](http://www.tenderwizard.com/OREDA) if bidder intends to participate in tender, it has to use its e-tendering User ID and Password which has been received after registration and acquisition of DSCs (Digital signature certificate) and to follow the step by step instructions given below.

- Insert the PKI (which consists of your Digital Signature Certificate) in your System.  
  *(Note: Make sure that necessary software of PKI has been installed in your system)*
- Click / Double Click to open the Microsoft Internet Explorer (This icon will be located on the Desktop of the computer)
- Go to Start > Programs > Internet Explorer. Type [www.tenderwizard.com/OREDA](http://www.tenderwizard.com/OREDA) in the address bar, to access the Login Screen.
- Enter e-tender User Id and Password, click on “Go”.
- Click on “Click here to login” for selecting the Digital Signature Certificate. Select the Certificate and enter DSC Password. Re-enter the e- Procurement User Id Password.
- Click “Un Applied” to view / apply for new tenders.
- Click on Request icon for online request. After making the request, bidder has to pay the requisite tender processing fee (as indicated in tender notice) through e-payment facility only available in the portal. Bidders will receive the Tender Documents which can be checked and downloaded by following the below steps.
  - Click on the “Show form” icon.
  - Tender documents will appear on the screen.
  - Click “Click here to download” to download the documents.

**D. SUBMISSION OF EMD AND TENDER COST:**

The bidders shall have to scan the Demand Draft towards EMD and Tender Cost and upload the same in .pdf or .jpg format. Refer Annexure H for EMD format.

**E. SUBMISSION OF TECHNO-COMMERCIAL BIDS:**

The techno-commercial bid sheets in .xls format are to filled up and up-load without changing the file name. Submission of incomplete techno commercial bid sheets will be liable for rejection of the bid.

- Scanned copies of all related documents as per the checklist shall be uploaded in .pdf or .jpg format prior to last date and time of receipt of bids as specified in tender Notice.

**F. SUBMISSION OF PRICE BIDS (Refer Annexure I for the format of Price Bid)**

The bidder should fill up price schedule in the given bid sheets in .xls format and up-load the same without changing the file name. The bid will be rejected if the schedule of price is submitted in incomplete form.
After completing all the formalities, Bidders will have to submit the tender as specified in NIT and must take care of all instructions. Prior to submission, verify whether all the required documents have been attached and uploaded to the particular tender or not.

**Note:**

- Price Bid must be submitted only for a single system of 10 kW, 7.2 Vah/Wp
- Local MSME Bidders are not permitted to submit price bids.
- The bid sheets (.xls file) shall be uploaded in www.tenderwizard.com/OREDA portal, prior to online closing of the tender. By no other means (except online) price bid shall be accepted for evaluation of tender.
- Please note down or take a print of bid control number once it displayed on the screen.

**G. SUBMISSION OF HARD COPIES**

- Along with the e-tender, bidders shall also submit hard copies of all uploaded as well as other documents as asked for in the bid document in the form of a single hard bound book properly page numbered and Indexed. **No loose/ separate paper or spiral bound documents will be accepted.**
- The bidders must sign at the bottom of all the pages of the hard bound book including each page of the bid document(which will also form an integral part of the hard bound book) as token of unconditional acceptance of the departmental terms and conditions, technical specifications etc.
- The Hard bound copy must be submitted in OREDA office at S-57, Mancheswar Industrial Estate, Bhubaneswar 751010 on or before the stated date in the manner prescribed elsewhere in the document. Submission extra/ unrelated documents may be avoided.

**Note:**
Filled in price bids/copies of the uploaded price bids must not be submitted in hard form. Submission of the same in hard form will liable the tender for rejection.

**4. DEAD LINE FOR SUBMISSION OF BIDS**

- Soft copy of the bid shall be uploaded through the portal www.tenderwizard.com/OREDA on or before the last date and time specified for online submission of the bids.
- DD towards Tender cost, DD towards EMD, tender processing fee acknowledgement & a set of hard copies of all uploaded documents must be received by OREDA at the address specified not later than the time and date stated in the tender notification.
• In the event of the specified date for the submission of bids being declared a holiday for OREDA, the bids will be received on the next working day as per the time indicated in tender notification.

• OREDA may, at its discretion, extend this deadline for submission of bids by amending the Bidding Documents in accordance with Instruction to Bidders for the reasons specified therein at any time prior to opening of, in which case all rights and obligations of Employer and bidders will thereafter be subject to the deadline as extended.

5. LATE BIDS

• Soft copy of the bid will not be uploaded on the portal after expiry of submission time and the bidder shall not be permitted to submit the same by any other mode. In such case, even if the bidder has submitted the specific documents in hard copy in original (viz., EMD, tender cost & any other document) within the stipulated deadline, its bid shall be considered as late bid. The hard copy submitted [specific documents (viz., EMD, tender cost.) shall be returned unopened to the bidder.

• Hard copy of the EMD in shape of DD if received by OREDA after the last date for submission of the bid the same will be considered as late bid even if the bidder has uploaded the soft copy of the bid within the stipulated deadline.

• In such a case, the soft part of the bid uploaded on the portal shall be sent unopened to “Archive” and shall not be considered at all any further.

6. MODIFICATION AND WITHDRAWAL OF BIDS

• Bidder may modify or withdraw their bids through the relevant provisions on the portal www.tenderwizard.com/OREDA up to the due date and time of submission of bid indicated in tender notification

• The Bidders may modify and resubmit their bids as per the provisions given in the portal.

• Bidders may withdraw their bids through the relevant provisions as mentioned in the portal.

7. PROCEDURE FOR OPENING THE BIDS:

• The Technical bid shall be opened at the time & date mentioned in the NIT by OREDA in the presence of bidders, who choose to be present. If necessary, the firms may be called for Technical Presentation the schedule for which will be intimated by OREDA.

• The Price bid shall be opened after evaluation of technical suitability of the offers. The date for opening of Price bid shall be communicated subsequently. The Price Bid of only those bidders shall be opened who qualify in the technical bid.
• If due to any reason the due date is declared as a holiday the bid will be opened on next working day at the same time.
• Tender Opening event can be viewed online.
• Competitors bid sheets can also be viewed by all participating bidders.

8. **SELECTION OF VENDORS:**

• Following opening of the price bids of technically qualified vendors the same will be evaluated by the designated purchase committee and the qualified vendors will be arranged in order of their quoted price for the complete work as L1, L2, L3……. Ln.

• In view of the quantity and geographical spread of the work, the entire work will be divided among the first 2 vendors in order of their quoted prices i.e L1 & L2 subject to the agreement of L2 to execute the work at L1 price. In case the L2 bidder do not agree to the L1 price and those in the upper ladders such as L3, L4, L5, L6, L7 ,L8 .... etc agree to the L1 price, they will be enlisted within L2 in the order of their originally quoted price and will be shortlisted for executing the work.

• **Local MSME bidder shall be selected on the basis of higher experience and turnover upon approval of the purchase committee.**

9. **ALLOCATION OF WORK:**

• Under normal circumstances the work will be allotted in the following manner

  L1: 50% of the total work
  L2 (willing to execute at L1 price): 25% of the total work
  Local SMEs (willing to execute at L1 price) 25% of the total work

  Depending upon the performance of the vendors, Chief Executive, OREDA will be at liberty to cancel/modify/revise the work orders of any of the selected vendors including the local SMEs.

  All supply / installation orders shall be placed with the state local registered office of the qualified vendors only.

• The allotment of the area / districts will be the discretion of OREDA.
• However, while allocating the work / care will be taken to allot contiguous patches to bidders so that subsequent maintenance etc will be easier.
ISSUE OF LETTER OF INTENTS (LOI)

- Allocation of work will be done through specific work orders issued in the name of the select bidders.
- Prior to issue of work orders a Letter of Intent will be issued to the selected bidders detailing out the quantity and scope of the works, locations of works, Bank Guarantees and documents to be submitted before issue of work orders, other deliverables, etc.
- Upon receiving the same the bidder is required to visit the project sites along with AD(T)/Technician of the concerned districts, discuss details of the project with the concerned customers, finalize the exact sites of installation, loads to be separated for connecting to the solar power plants, convenient dates of installation etc. as well as all logistics details. Following this the bidder has to submit a letter of acceptance of the LoI along with the required bank guarantees, work execution schedule etc. and after of the same by Chief Executive, OREDA formal work orders will be issued.

10. ACCEPTANCE/REJECTION:

OREDA reserves the right to accept / reject any or all Tenders without assigning any reason thereof and alter the quantity of materials mentioned in the Tender documents at the time of placing purchase orders. Tender will be summarily rejected if:

i) EMD is not deposited either in shape of Bank Draft in favour of OREDA payable at Bhubaneswar or in Bank Guarantee (BG).
   
   Note: EMD against previous Tenders, if any, will not be adjusted towards EMD against this Tender.

ii) Submission of incomplete technical and /or financial bid sheets.

iii) Non submission of any of the documents (both soft and hard) as asked for in the tender document.

iv) Submission of Late bids.

NOTE: Only bidders applying in the Local MSME category are exempted from submission of EMD/Tender cost subject to submission of such exemption certificates. Bidders applying in the General category have to submit the EMD & Tender cost.

11. VALIDITY OF OFFER:

The offer must be kept valid for a period of one year from the date of opening of the technical bid or till the completion of the project whichever is later. No escalation clause except the admissible tax component under the period of consideration would be accepted.

12. WARRANTY:

- The complete system should be warranted against any manufacturing defect or bad workmanship at least for a period of 5 (five) years from the date of commissioning of the systems.

- Major system sub-component SPV modules must be warranted against any manufacturing defect of bad workmanship for a period of 5 years.
• Warranty certificate to the above effect must be furnished along with the commissioning reports. Any defect noticed during warranty period should be rectified / replaced by the supplier free of cost upon due intimation by OREDA.

13. **PENALTY AND TERMINATION OF CONTRACT:**

- The systems shall be supplied, installed and commissioned within the scheduled time. If the bidder fails to adhere to the schedule, OREDA shall without prejudice to its other remedies under the contract deduct from the contract price as liquidated damages a sum equivalent to 1% of the delivery price of the delayed goods or unperformed services for each week of delay until actual delivery or installation/commissioning up to a maximum deduction of 5% of the contract price for delayed goods or installation and commissioning. Once the maximum is reached (i.e 5 weeks of delay) OREDA may consider termination of the contract and forfeit the security deposit without prejudice to the other remedies of the contract.

- However, Chief Executive, OREDA may at own discretion allow reasonable time extension upon written application of the supplying firm. If the delay is considered intentional or due to the negligence of the vendor, no extension can be allowed with imposition of penalty. If the delay is considered to be genuine time extension can be allowed without imposition of penalty.

14. **FORCE MAJEURE:**

The supplier of the SPV system shall not be charged with liquidated damages nor shall his security for performance be forfeited when failure of the supplier in making delivery is due to any event beyond the control of the supplier and could not have been foreseen, prevented or avoided by a prudent person. These include, but are not restricted to acts of nature, acts of public enemy, acts of Government, fires, floods, epidemics, strikes, freights, embargoes and unusually severe weather.

15. **INSPECTION:**

- All tests and inspections shall be made at the place of delivery. Officers authorized by OREDA shall be entitled at all reasonable time to inspect and supervise and test during erection and commissioning. Such inspection will not relieve the executing firm of their obligation in the contract.

- OREDA shall have the right to have the tests carried out at its own cost by an independent agency at any point of time.

16. **PAYMENT:**

- 90% of the cost of system and installation charge along with all applicable tax shall be released upon commissioning of the systems at the location specified in the purchase order upon due verification by authorised officers and submission of following documents.
- Performance report signed by the Assistant Director, OREDA
- PCR & JCC
- Warranty
- GPS based installation photograph
- Web enabled generation report
- I-V Curves
- Operation manual
- Dos & Don’ts in the form of a booklet
- Conducting training programme
- Login credentials of Generation Meter

- Balance 10% cost of the supplied materials, Installation & Commissioning charges will be released after 3 months successful performance following submission of the following

Submission of monthly/hourly power consumption reports supported by the reading of inverter given with the power plant in the format given.

17. **Execution:**

Execution of work shall be carried out in an approved manner as outlined in the technical specification or where not outlined, in accordance with relevant Indian Standard Specification, to the reasonable satisfaction of the Authorized OREDA Officer. The general schedule of execution will be as follows

- Under normal circumstances all ordered systems must be installed and commissioned in all respects within 90 days of receipt of firm work order from OREDA.

- Under exceptional circumstances Chief Executive, OREDA may consider to extend the execution period by a maximum of 90 days upon written application of the vendor stating justified reasons for delay which should be supported by the concerned customer and recommended by the concerned AD(T) of OREDA.

- Upon intimation about commissioning of the systems by the executing firm a joint inspection will be carried out by the representatives of the executing firm, OREDA and User organization.

- The issuance of a JCC shall, in no way relieve the executing firm of its responsibility for satisfactory operation of the power plant.
The bidder must securitize the execution schedule by providing bank guarantee equal to 10% of the ordered value from any nationalized bank with validity of 200 days from the date of issue of the work order. In case of delay beyond the approved period the bank guarantee will be encashed and retained by OREDA. Additionally penalty may be imposed / order may be terminated as per provisions in the tender.

**Penalty and Termination of Contract:**

The systems shall be supplied, installed and commissioned within the scheduled time. If the bidder fails to adhere to the schedule, OREDA shall without prejudice to its other remedies under the contract deduct from the contract price as liquidated damages a sum equivalent to 1% of the delivery price of the delayed goods or unperformed services for each week of delay until actual delivery or installation/commissioning up to a maximum deduction of 5% of the contract price for delayed goods or installation and commissioning. Once the maximum is reached (i.e 5 weeks of delay) OREDA may consider termination of the contract and forfeit the security deposit without prejudice to the other remedies of the contract.

**18. Comprehensive Maintenance Contract (CMC):**

- Upon selection, the bidder must enter into a Comprehensive Maintenance Contract with OREDA for a period of 5 years from the date of commissioning of each project in the format given at Annexure-E. Willingness to execute such CMC will have to be submitted along with the tender.

- The broad scope of CMC shall cover
  
  a. Routine visit to each project site at least once in 3 months.
  b. Attend maintenance calls given by customer/ escalated by OREDA-CRC within maximum 3 days of receipt of the intimation.
  c. Repair/Replace defective/malfunctioning spares/components within warrantee period.
  d. Provide monthly kWh meter reading to OREDA.

At the time of execution of maintenance contract the bidder shall deposit five numbers of bank guarantees (BG) each of value equal to 2 % of ordered value towards maintenance Performance Guarantee fees with the Chief Executive, OREDA having validity of 1, 2, 3, 4 and 5 years respectively from the date of commissioning of the systems.

The Performance Bank Guarantees will be returned after completion of 1st, 2nd, 3rd, 4th and 5th year maintenance and submission of reports thereon.

Annual Maintenance Charges (AMC) will be paid annually upon successful maintenance of the systems and submission all necessary reports thereon.
Note:
Execution of CMC and submission of Performance Bank Guarantees (Format at Annexure-F) are pre conditions for release of 1st payment of 90%.

19. **LIMITATION OF LIABILITY:**

OREDA, will, in no case be responsible for any accident fatal or non-fatal, caused to any worker or outsider in course of transport or execution of work. All the expenditure including treatment or compensation will be entirely borne by the Executants. The Executants shall also be responsible for any claims of the workers including PF, Gratuity, ESI & other legal obligations.

20. **WORK EXECUTION SCHEDULE:**

- All ordered systems must be installed and commissioned in all respects within 90 days of receipt of firm work order from OREDA.
- Under exceptional circumstances the period of execution can be extended reasonably only upon written request by the vendor.
- Upon intimation about commissioning of the systems by the executing firm a joint inspection will be carried out by the representatives of the executing firm, OREDA and User organization.

The issuance of a JCC shall, in no way relieve the executing firm of it’s responsibility for satisfactory operation of the power plant.

21. **DISPUTE:**

For adjudication of any dispute between OREDA and the bidders arising in this case, reference can be made to any Law courts under the jurisdiction of Odisha High court only. The Chief Executive, OREDA reserves the right to accept or reject any or all bids without assigning any reason thereof.

Sd/-

CHIEF EXECUTIVE

I/We have carefully read and understood the above terms and conditions of the bid and agree to abide by them.

**SIGNATURE OF BIDDER WITH SEAL**

**TECHNICAL SPECIFICATION FOR 10KW SPV POWER PLANT**

*Refer Annexure J for Single Line Diagram*

The general scope under this contract includes to design, manufacture, testing, inspection, packing and forwarding, transportation up to project site, loading & unloading, storage in safe custody, erection, carrying out preliminary tests at site, commissioning, performance testing, operation and maintenance for 5 years & handing over to all the equipment of SPV Power plant on the respective sites / as per instruction from time to time. The illustrative Schedule of requirements is in accordance with the specifications contained in this document.

### 1. SOLAR PV MODULES:

The modules having capacity above 200Wp should only be provided in the array to obtain the required array power output. Indigenously produced PV module (s) containing mono/multi crystalline silicon solar cells should only be used. All modules must comply with to IEC 61215, 61730 part 1 & 2 (Certificates from MNRE test centres in support of such compliance must be submitted along with the tender document. The other criteria are as follows:

- **Crystalline Silicon Solar Cell Modules** IEC 61215 Edition (II)
- **PV modules must have quality to IEC 61730 Part I & II, for safety qualification testing and to be used in a highly corrosive atmosphere throughout their lifetime, they must qualify to IEC 61701.**

- **PV modules used in solar power plants must be warranted for output wattage, which should not be less than 90% at the end of 10 years and 80% at the end of 25 years.**

- **Each PV module used in solar power project under this tender must use a RF identification tag (RFID), which must contain the following information. The RFID should be laminated inside the module and but must be able to withstand harsh environmental conditions.**
Name of the manufacturer of PV Module.
Name of the manufacturer of Solar cells.
Month and year of the manufacture (separately for solar cells and module).
Country of origin (separately for solar cells and module).
I-V curve for the module.
Peak Wattage, Im, Vm and FF for the module.
Unique serial No and Model No of the module.
Date and year of obtaining IEC PV module qualification certificate.
Name of the test lab issuing IEC certificate.

2. Module Mounting Structure:

i. Hot dip galvanized MS/Aluminum mounting structures shall be used for mounting the modules/ panels/arrays. Each structure will have angle of inclination as per the site conditions to take maximum insolation.

ii. The Mounting structure must be Non-invasive Ballast Type and any sort of penetration of roof to be avoided. The design details are as follows:

   a. The inclination of module should be within 10-15 degrees.

   b. The upper edge of the module must be covered with wind shield so as to avoid bulk air ingress below the module. Slight clearance must be provided on both edges (upper & lower) to allow air for cooling.

   c. An indicative drawing is shown at Annexure K

iii. The mounting structure should be as per latest IS 2062: 1992 and galvanization of the mounting structure shall be in compliance of latest IS 4759.

iv. The fasteners should be made up of stainless steel. The structures shall be designed to allow easy replacement of any module. The array structure shall be so designed that it will occupy minimum space without sacrificing the output from the SPV panels.

v. The total load of the structure (when installed with PV modules) on the terrace should be less than 60 kg/m². The load shall be well distributed so that point loads are well within the limits.

vi. The minimum clearance of the structure from the roof level should be in between 70-150 mm.

vii. The structures should be laid on the rooftop on weather resistant FRP mountings which should be non-penetrating type and proper drainage of rain water over terrace through the installation area should be maintained.

viii. The structures should be suitably loaded with reinforced concrete blocks of appropriate weight made out of M25 concrete mixture.
ix. Special care should be taken while designing all structures for modules to cater to heavy rainfall.

x. The array shall be located sufficiently inside the boundary wall of the terrace (parapet wall) and should not be projecting out. PV array shall be installed in the terrace space free from any obstruction and/or shadow. PV array shall be installed utilizing optimum terrace space to minimize effects of shadows due to adjacent PV panel rows.

xi. Adequate spacing shall be provided between two panel frames and rows of panels to facilitate personnel protection, ease of installation, replacement, cleaning of panels and electrical maintenance.

xii. Additional waterproofing shall be provided in the areas where RCC blocks are placed on the terrace.

xiii. The minimum clearance between lower edge of PV panel and terrace ground level shall be 150 mm to allow ventilation for cooling, also ease of cleaning and maintenance of panels as well as cleaning of terrace.

xiv. The PV array structure design shall be appropriate with a factor of safety of min. 1.5.

xv. Each array may be provided with two bird repellents spikes at a level higher than the upper edge of the array. The location of the spike should be selected for minimum shadow effect.

xvi. The support structure shall be free from corrosion when installed.

xvii. PV modules shall be secured to support structure using screw fasteners and/or metal clamps. Screw fasteners shall use existing mounting holes provided by module manufacturer. No additional holes shall be drilled on module frames. Module fasteners/clamps shall be adequately treated to resist corrosion.

xviii. Adequate spacing shall be provided between any two modules secured on PV array for improved wind resistance.

xix. The structure shall be designed to withstand operating environmental conditions for a period of minimum 25 years.

xx. The structure should be appropriately designed to withstand high wind velocities up to 180-200 km per hour. (The bidder is required to submit a certificate from an authorized chartered engineer with regards to the strength and durability of the structure)

3. Junction Boxes (JBS):

The junction boxes shall be dust and waterproof and made of thermo-plastic. The terminals will be connected to copper lugs or bus bar of proper sizes. The junction boxes will have suitable cable entry points fitted with cables glands. Suitable markings shall be provided on the legs or bus bar for easy identification and cable ferrules will be fitted the cable termination points for identification. Each main junction box shall be fitted with appropriate rating blocking diode. The junction boxes shall be of reputed make.

- Array Junction Box should be IP 65 as per IEC 60529 and should be provided with fuses and Isolators of suitable ratings.
- DC Distribution board should comply with IP 21 as per IEC 60529. It should be equipped with suitable rating of DC isolators for solar input from array junction
box and fuse of suitable rating between PCU and battery.

- AC distribution board should comply with IEC 529 and should be equipped with suitable rating of MCB between PCU and load.
- All switch, circuit breakers and connectors should comply with IEC 60947 (part – i, ii, iii) / is 60947 (Part-i, ii, iii).

4. **BATTERY BANK:**

There will be one battery bank comprising of appropriate capacity for respective SPV Power Plant. The batteries should be VRLA Type and shall have long service life. The cells should confirm IS 15549/ IEC 61427 / IS 1651 / IS 133369 and as per specification given below shall be provided.

<table>

</tbody>
</table>

5. **POWER CONDITIONING UNIT (PCU):**

As SPV array produce direct current electricity, it is necessary to convert this direct current into alternating current and adjust the voltage levels before powering equipment designed for nominal mains AC supply. Conversion shall be achieved using an electronic Inverter and the associated control and protection devices. All these components of the system are termed the “Power Conditioning Unit” OR simply PCU. In addition, the PCU shall also house MPPT (Maximum Power Point Tracker), an interface between Solar PV array & the Inverter, to maximize Solar PV array energy input into the System. PCU should conform IEC 61683, IEC 60068, IEC 62116 as per specifications.

PCU refers to combination of charge controller, inverter and AC charger and shall be supplied as integrated unit or separate units.

**Inverter:**

The inverter will be highly efficient. The inverter should confirm IEC 61683 /IS 61683, IS 16169/IEC 62116, IEC 60068 and should be based on MPPT design. Inverters would display its own parameters and the parameters of battery bank connected to the inverter. Beyond
the maximum load the inverters will trip. The inverters should be designed to be completely compatible with the charge controllers and distribution panels and are of integrated design.

Salient features of the Inverters shall be as follows:

- The PCU should be designed to be completely compatible with the SPV array voltage.
- A Central inverter with MPPT shall be used with the power plant for maximum efficiency and shall be efficient based on PWM with IGBT/ reliable power based design.
- The sine wave output of the inverter shall be 230V, Single phase, 50 HZ AC.
- **There should be provision to charge the battery using Grid power as long as grid voltage is between 170V-265V. In case Grid voltage falls below 170V up to 130V, Grid charging shall stop but load shall continue to run using Grid supply not by Solar.**
- The peak inverter efficiency inclusive of built in isolation transformer shall exceed 85% at full load
- There should be provision to export excess PV power to grid in case the load consumption is less than the actual generation. **This is futuristic feature and provision should be there to enable or disable this export feature.**
- Inverter shall provide display of PV array DC voltage & current, Battery Voltage & Current, Inverter Voltage & Current, Grid voltage & Current, Battery charging status and required parameters when fault occurs. Remote monitoring of inverter parameters should be possible.
- Operating temperature Range shall be 0 to 55 deg C
- Maximum Power Point Tracker (MPPT) shall be integrated in the power conditioner unit to maximize energy drawn from the Solar PV array.
- The charge controller/ MPPT units should qualify to IEC standards.
- Online microprocessor based Data Acquisition Systems and Remote Monitoring facility for 365 days with data Recovery from remote location should equip.

**Charge Controller Unit:**

The Charge Controller shall be dual input type, where under normal condition the input is fed from a SPV panel and in the absence of SPV power or low SPV power conditions an external single phase AC source can be used for battery charging. A selector switch shall be provided for choosing between those modes. When the batteries are charged from external AC sources, the charging current should be set manually depending on the capacity of the source and the charging requirement of the batteries. The charge controller shall be of MPPT type / PWM type employing IGBT switching elements.

Charge controller should confirm IEC 62093 / IEC 60068 as per specification.

The charging sequence from SPV array or external AC source shall be as follows:

**From SPV Array:**

The battery shall be charged at the maximum rate depending on the solar radiation until the battery terminal voltage reaches 2.25 volts per cell. The battery charging should be automatically terminated when the rate of increase of battery voltage is steady (dv/dt sensing). The charger shall switch on the "trickle charge after this."

**From AC Source:**

The battery shall be charged at the rate manually set depending on the battery condition or capacity of AC source. The maximum rate shall be internally preset.

The battery charging should be automatically terminated when the rate of increase of battery voltage is steady (dv / dt sensing) or when the battery terminal voltage reaches 2.75 volts per cell.

Salient features of the Charge Controller shall be as follows:

- **Switching elements:** IGBT/MOSFET
- **Type of Charger:** PWM
- **Input:** From Solar PV array
- **Output Voltage:** Suitable for charging nominal battery bank from respective capacity of SPV array.
- **Protections:** Short Circuit, Deep Discharge, Input Surge Voltage, Over Current (load), Battery Reverse Polarity, Solar array reverse polarity.
- **Indication:** String „ON“, Main „ON“, Charging „ON“, 80% Charged, 100% Charged, Charger Overload, Battery On Trickle

MIMIC Diagram: To indicate power flow and operation of the charge controller/ battery charger; shall have provision for visual indications of existing power input/output through MIMIC diagram.

You may design Power Conditioning Unit (PCU), which consist of a solar charge controller & inverter as per design mentioned above. In addition, it should have a Grid Charger. It provides the facility to charge the battery bank either through Solar or Grid set. The PCU continuously monitors the state of Battery Voltage, Solar Power output and the loads. Due to sustained usage of power, when the Battery Voltage falls below a preset level, the PCU will automatically transfer the load to the grid power and also charge the Batteries through the in-built Grid Charger. Once the batteries are charged to the present level, the PCU cuts off the Grid power from the system and will restore to feeding the loads from the battery bank & continue to charge the battery bank from the available solar power.

The PCU always gives preference to the solar power and will use Grid power only when the solar power / battery charge is insufficient to meet the load requirement.

**Salient Features:**

- Priority of charging is from Solar panels.
- Over heating Protection.
- Dual Display Showing PV & Inverter output.
- Short circuit & Over load Protection.
- Inbuilt Heavy Duly Solar Charge Controller.
- No Load Shut Down for load = 5% (not applicable for > 1 kVA systems) Fully equipped with powerful Grid Charger.
- User friendly client and Web based Software.

6. **AC DISTRIBUTION PANEL BOARD:**

The AC Distribution Board shall consist of the components as per designed PCU.

7. **CABLES & WIRINGS:**

The Cable & Wires should comply to IEC60227 or IS694 & IEC60502 or IS1554 BSEL50618 (for DC cables for PV systems). The details are as follows:

- Cables running between solar panels and array junction box should be 4 Sqmm copper flexible.
- Cables running between AJB and DCDB should be of 25Sqmm copper flexible cable.
  - Cable running between PCU and battery should be 25Sqmm coppers flexible cable.
  - Cable running between PCU and ACDB should be 6 Sqmm Copper cables.
  - All copper flexible cables should comply to IS651 and make should be
Polycab, Havells or equivalent.

- Colour code should be followed for over all wiring i.e, red for positive, black for negative, green for earth.
- All cable should run in suitable PVC Conduits. No cable should be directly exposed to sunlight.

8. **DANGER PLATES:**
The bidder have to provide at least 8 Danger Notice Plates of 200 mm X 150 mm made of mild steel sheet, minimum 2 mm thick and vitreous enamelled white on both sides and with inscription in signal red colour on front side as required. The inscription shall be in English and local language. Out of eight, four danger notice shall have to be provided at PV Power plant & Four-danger notice at Control Room & Battery room.

9. **Lightening & Over Voltage Protection System:**
   - The SPV power plant should be provided with Lightning and over voltage protection, connected with proper earth pits. The main aim of over voltage protection is to reduce the over voltage to a tolerable level before it reaches the PV or other sub-system components. The source of over voltage can be lightning or other atmospheric disturbance.
   - The lightning Conductors shall be made of 25 mm diameter 4000 mm long GI spike as per provisions of IS 2309-1969. Necessary concrete foundation for holding the lightning conductor in position to be made after giving due consideration to maximum wind speed and maintenance requirement at site in future. The lightning conductor shall be earthed through 20 mm X 3 mm thick GI flat earth pits/earth bus made with 25 mm X 5 mm GI flats.
   - Most areas of the State being prone to lightening, Type-II SPDs shall be included as a mandatory requirement.
   - Similarly Type I+II SPD should also be provided on the grid side in ACDB or PCU to protect the PCU from damage.

10. **Earthing Systems:**
Chemical Earthing (Maintenance Free) system including Lightning & Surge Protection arrangement to be provided. Earthing system design should be as per the standard practices and should conform to the latest edition of IS 3043.

11. **Display Board:**
You shall provide the display board of size 3 ft x 3 ft that gives detailed circuit diagram of the system with its description.

12. **Comprehensive Maintenance Contract (CMC):**
   - The PV module(s), battery bank, Inverter and other sub - components will be warranted as per the given clause. The manufacturers can also provide additional information about the system and conditions of warranty as necessary.
• Scope of Operation & Maintenance of SPV Power Plant for a period of 5 years from date of commissioning
• Regular maintenance of the SPV Power Plant for a period of 5 years after commissioning along with supply of consumable items.
• The breakdown maintenance of the entire system including supply of necessary spare parts if any shall be for a period of 5 years from the date of commissioning of power plant
• 5 years maintenance period shall begin on the date actual commissioning of the power plant.
• Normal and preventive maintenance of the power plant shall be covered under CMC.
• During maintenance period of the power plant, if there is any loss or damage of any component of the power plant due to miss management/miss handling or due to any other reasons pertaining to the vendor’s deputed personnel, whatsoever, the vendor shall be responsible for immediate replacement/rectification. The damaged component may be repaired or replaced by new component. It is understood after examination the performance of the component or the system shall not degrade.

13. **Drawings & Manuals:**
2 copies of Engineering, electrical drawings and Installation and O&M manuals are to be supplied. Bidders shall provide complete technical data sheets for each equipment giving details of the specifications along with make/makes in their bid along with basic design of the power plant and power evacuation, synchronization and distribution for street lighting system along with protection equipment. Approved ISI and reputed makes for equipment be used. For complete electro-mechanical works, bidders shall supply complete design, details and drawings for approval to OREDA before progressing with the installation work.

14. **Remote Monitoring System:**
The Solar PV Power plant must be provided with remote monitoring system embedded to the Generation Meter. The RMS must be capable of providing ONLINE Generation data (daily, monthly, yearly & total). The features of the RMS along with operational details must be submitted along with the Bid. These systems should work using GSM/GPRS data communication service (GSM/GPRS service shall be provided by the Vendor for 5 years including data charges) or SMS (Short Message Service). They must provide data on power generation every 15 minutes indicating all spikes, dips etc.

*Important features:
  a. Cloud based Communication
  b. Dashboard display either on PC, Laptop, Tab, smart phone
  c. Internal communication protocols.

*Monthly Report has to be submitted to OREDA.

SAMPLE FORMAT FOR C.M.C

(Subject to modification as per suitability of system and project requirement)

Comprehensive Maintenance Contract (CMC) for maintenance of SPV power plant supplied and install by M/S .............................................................

.............................................................

for five years.

This Comprehensive Maintenance Contract (CMC) is executed between the Orissa Renewable Energy Development Agency (OREDA), S-3-59, Mancheswar Industrial Estate, Bhubaneswar-10, represented by its Deputy Director (Tech), Project Division herein after called as Ist. party and M/S .............................................................

.............................................................

herein after called as 2nd party, for maintenance of ........ sets of ............................................ for a period of five years with effect from ................. AD, supplied, installed and commissioned vide purchase order No ................. Dated ................. in ................. village ................. blocks of ................. Districts.

The 2nd party will maintain these ........ Systems as per the terms and conditions mentioned hereunder.

1. It has been envisaged in the purchase order No ............../ OREDA dated ................. under clause No .......... that these ........ No/sets of .................. shall be warranted against any manufacturing defect and bad workmanship at least for a period of 5 years for the system and battery and 10 years for the PV modules from the date of commissioning. As these systems have been commissioned and handed over to the 1st party through its Assistant Director (Tech) / authorized OREDA official at DRDA ......................... During ......................... all these systems, as such are covered under warranty period up to ................., ................. and ................. respectively. Hence, the 2nd party is fully responsible for their trouble-free maintenance and the 2nd party is liable to rectify / remove any defect noticed within the aforesaid period free of cost.

2. The 2nd party will impart training to two nos. of youth from each completed village to be able to provide first aid repair service for the SPV systems installed in the village.

3. The 2nd party will ensure a formal training of such identified youth (2 from each village) at a cluster level of villages in consultation with the 1st party.

4. An amount of 10% of the ordered value shall be kept as fees towards Performance guarantee for a period of 10 years of warranty & maintenance. After expiry of the successful and satisfactory maintenance period of 10 years which remains valid up to ................. AD, the security deposit / PGF shall be returned to the 2nd party thereafter only.

5. The CMC includes repair/ replacement of all spares and consumable, including CF Lamp, battery & PV module during the maintenance period.

6. The 2nd party will setup a state level office at Bhubaneswar duly headed by a Service Engineer.

7. The 2nd party shall undertake the periodical maintenance work of these ...... sets prescribed formats attached herewith (Format I) on the 10th of every succeeding quarter duly countersigned by the concerned Assistant Director (Tech), / Authorized Officer, R.E. Cell, DRDA .........................
8. The 2nd party should be in readiness to attend to the defects of any system (out of these .......... Sets), as and when required by the beneficiary/1st party and ensure rectification of defects and restore functionality within seven days of lodging the complaints. The 2nd party shall furnish the status report after the maintenance work are over, which shall invariably bear the signature of the beneficiaries as per the format annexed herewith (format- II).

9. The 2nd party shall appraise the 1st party about the requirements and supply of spares during warranty as well as CMC period.

10. The 2nd party will ensure to submit quarterly reports of visits made by their representatives to the completed villages every three months during the warranty and CMC period.

11. The 1st party in consultation and cost sharing with the 2nd party will maintain a central complaint cell at Bhubaneswar alongwith adequate stock of spare parts as a backup.

12. Separate bills/ invoices in triplicate enclosing the prescribed formats duly filled in (Format-I and II) are to be submitted by the 2nd party to 1st party for effecting payment after end of the each year from the date of maintenance of the systems.

13. Certificates in support of successful maintenance of the system(s) shall be obtained from the users which should be countersigned by the Assistant Director (Tech), / Authorised Officer, RE Cell, DRDA .................. In token of verification of maintenance done.

14. It will be the liberty of the 1st party to cross check the systems maintained by the 2nd party. Random verification of the maintenance may be carried out by the 1st party wherever necessary.

15. The 2nd party may continue to maintain the gadgets after expiry of the maintenance period of 10 years, provided the beneficiaries/1st party desires.

16. For adjudication of any dispute between the two parties arising on execution of this CMC, the matter shall first be brought to the notice of Chief Executive, OREDA.

17. In case, there will be no amicable settlement of the issues, the matter can be referred to the court of law having jurisdiction at Bhubaneswar only. The Annual Maintenance contract is signed jointly between the two parties today i.e on dated ................. day of 2016 and shall come into force from the date of its signature(s).

Forwarding Letter

(To be submitted in the letter head of the applicant)

To,

The Chief Executive
Odisha Renewable Energy Development Agency (OREDA)
S.59. MIE, Bhubaneswar -751010
Odisha.

Sub:- Submission of tender for Design, supply, installation, commissioning and maintenance for a period of 5 years of 10 kW, 7.2 Vah/Wp solar power plant at 20 No. of Schools/Hostels for ITDA, Kandhamal

Sir,

Having studied the bid document carefully I/we, the undersigned, offer to submit our bid for Design, supply, installation, commissioning and maintenance for a period of 5 years of 10 kW, 7.2 Vah/Wp solar power plant at 20 No. of Schools/Hostels for ITDA, Kandhamal

I/We have also read the various provisions therein and confirm that the same are acceptable to us. We further declare that any additional conditions, variations, deviations, if any, shall not be given effect to. We further understand that any deficiency / illegibility in documents shall make our application liable for rejection.

I/we submit our application understanding fully well that
(a) The documents submitted along with our application are subject to verification by appropriate authorities.
(b) OREDA reserves the right to accept or reject any application or the empanelment process itself without assigning any reasons thereof and shall not be held liable for any such action.
(c) Any genuine changes made by OREDA in the interest of the work with respect to the technical requirement during the course of project implementation will be acceptable.
(d) All acts, rules, regulations, norms and conditions of Govt of India and Govt of Odisha shall be applicable during the process of empanelment as well as during the period of execution of project.

We hereby declare that all the information and statements made in this proposal are complete, true and correct and also accept that any misinterpretation contained in it may lead to our disqualification.

We hereby declare that our application has been submitted in good faith and the information contained is true and correct to the best of our knowledge and belief.

Yours faithfully,

Signature of bidder with seal
UNDERTAKING BY THE BIDDER

I/we here by undertake that

1. We have thoroughly read and examined the notice inviting tender and the tender document along with all its schedules, annexure etc.
2. The rates quoted by us are firm and final and are meant for execution of the allotted supply / installation within the time frame stipulated in the tender/supply / installation order.
3. All terms and conditions of the tender including the rates quoted by us shall remain valid for a period of min one year from the date of opening of the technical bids.
4. In case our tender is incomplete in any respect or we violate any of the prescriptions given in the tender for submission of the same OREDA shall , without prejudice to any other right or remedy , be at liberty to forfeit the earnest money deposited by us.
5. In case of award of supply / installation in our favour OREDA shall have the right to convert the EMD deposited by us in to full or part (as the case may be) of the security deposit to be deposited by us against award of the supply / installation.
6. In case we fail to commence or complete the supply / installation as per the time schedules or fail to fulfill any of the terms and conditions given in the tender OREDA shall , without prejudice to any other right or remedy , be at liberty to forfeit the security deposit made by us against the award of the supply / installation.
7. I/We hereby declare that I/We shall treat the tender documents, specifications and other records connected with the supply / installation as secret/confidential and shall not communicate information derived there-from to any person other than a person to whom I/We have authorized to communicate the same or use the information in any manner prejudiced to the safety of OREDA/the State Govt.
8. I/We shall abide by all the laws prevailing at the time of the execution of the supply / installation and shall be responsible for making payments of all the taxes, duties, levies and other Govt. dues etc. to the appropriate Govt. departments.
9. The entire tender document has been discussed in the Board meeting and a resolution has been concurred for participation in the tender (copy enclosed as given format)
10. We are not blacklisted / debarred / defaulted in any manner by any Central / State Government / Public Sector Undertaking in India.
11. In case any false documents submitted and found any time in future the firms shall be liable to be proceeded against as per prevailing laws.
12. Our state commercial tax / TIN registration no. is ___________________________ and
    CST registration No. ___________________________.
    The PAN No. under the Income Tax Act is ___________________________ and Service Tax Registration No. is ___________________________
13. I/We shall be responsible for the payment of the respective taxes to the appropriate authorities and should I/we fail to do so, I/we hereby authorize OREDA to recover the taxes due from us and deposit the same with the appropriate authorities on their demand.
